

Migrating Data from Redshift to Snowflake

As enterprises scale, they often encounter escalating costs and performance limitations with Redshift. Snowflake provides a more scalable and cost-efficient solution, and with 7Rivers' suite of Snowflake accelerators, your organization can transition smoothly to a powerful, optimized data environment.

At 7Rivers, we specialize in helping business leaders unlock the potential of their data with cutting-edge AI solutions. We transform raw data into actionable insights and real-world applications that drive progress.

Transformative Outcomes

50%

Reduced infrastructure & development for data ingestion¹

35%

Reduced infrastructure costs¹

Comprehensive Analysis

Redshift

Requires manual node management to scale

Limited support for semi/unstructured data

Costs accumulate due to always-on nodes & limited idle time

Snowflake AI Data Cloud

Separates compute & storage for flexible, instant scaling

JSON & VARIANT data support with flexible schema options

Pay-as-you-go model with rapid pause/resume capabilities

7Rivers' Snowflake Accelerators

7Rivers' suite of accelerators is purpose-built to enhance migration efficiency, security, and performance optimization, making it easier than ever to transition your data environment to the Snowflake AI Data Cloud.

Secure

Quickly stand up a Snowflake environment and apply RBAC based on Personas, Objects, and Privileges.

Profiler

Simplify data profiling of data sources and ingestion into Snowflake.

ProIngest

Painlessly get your data into Snowflake.

Optimizer

Optimize Snowflake usage to make your credits go further.

SQL Convert

Convert between different flavors of SQL.
